el-cemed Complete Plus Whitening

Regularly using el-ce med COMPLETE plus Whitening restores teeth to their natural white color. The active ingredient Penta-sodium Triphosphate starts by dissolving discolored deposits on the tooth's surface.

In optimal doses, the ingredient sodium fluoride actively prevents cavities.

Urea (carbamide), a component of the natural saliva blocking system, neutralizes tooth-damaging acids and helps keep cavities from forming while keeping your teeth and gums healthy. A carefully chosen flavor profile makes your mouth feel pleasantly fresh and clean.

For adult use only. Not suitable for children under the age of 6.

el-cemed Kräuter Plus

el-ce med KRÄUTER PLUS offers complete protection and lasting care to keep the teeth and gums healthy for as long as possible.

In addition to an active formula that gently but effectively fights dangerous plaque, the main cause of tooth decay, periodontitis and tartar, el-ce med KRÄUTER PLUS contains valuable herbal extracts from nature's pharmacy:

- healing chamomile
- anti-inflammatory myrrh
- protective sage
- revitalizing peppermint

For adults use only, not suitable for children under the age of 6.

el-cemed Cool Fresh For Kids

At this age it is not just the correct fluoride content (1450 ppm) that is important for dental and oral hygiene (recommendations of the DGZMK (Deutsche Gesellschaft für Zahn-, Mund- und Kieferheilkunde e.V. –registered German Association for Dental, Oral and Jaw Medicine), the DGK (Deutsche Gesellschaft für Kinderheilkunde und Jugendmedizin – German Association of Paediatrics and Youth Medicine) and the DGE Deutsche Gesellschaft für Ernährung –German Nutrition Society)), but also a great taste and an appealing look that helps to motivate regular teeth cleaning.

el-ce med COOL FRESH for cool kids **6 years and older**

- with optimal, age-based fluoride content
- with extra calcium for strong teeth
- cool gel toothpaste with glitter effect
- with extra cool BUBBLEGUM flavour

For adults use only, not suitable for children under the age of 6.

SILCA BRILLIANT WHITE

Brushing daily with SILCA BRILLIANT WHITE provides comprehensive protection against cavities, periodontitis, plaque and bad breath, and it also helps restore the natural white color of your teeth.

For adults use only, not suitable for children under the age of 6.

Colorants from foods & beverages like coffee & tea along with frequent tobacco consumption, can lead to unsightly staining of the teeth. These discolored deposits cannot be removed with conventional toothpastes.

Regularly using SILCA BRILLIANT WHITE for smokers restores teeth to their natural white color. By dissolving discolored deposits on the tooth's surface.

SILCA HERBAL EXTRACTS

As a common lifestyle disease, gum disease can now be found in every age group. One of the main reasons for its increase in frequency is the move away from foods that need more chewing toward fast food & ready-made dishes. When used regularly, SILCA HERBAL EXTRA-CTS offers comprehensive protection and lasting care for your teeth and gums. It contains selected herbal extracts of chamomile , calendula, sage and yarrow, which streng-

then the gums and can help prevent inflammations. The combination of carbamide and sodium fluoride neutralizes tooth-damaging acids and makes your teeth resistant to cavities.

For adults use only, not suitable for children under the age of 6.

SILCA SENSITIVE PLUS

Exposure of the neck of the tooth due to receding gums is proven to be the most common cause of sensitive teeth.

Tiny tubules are exposed by receding gums – these transport the different irritants directly to the nerve of the tooth,

The active-ingredient complex of SILCA SENSITIVE PLUS toothpaste seals these tubules and can therefore relieve pain.

SILCA SENSITIVE PLUS will not only relieve pain but also effectively protects

teeth against caries through its optimal fluoride content. In addition antibacterial zinc helps against plaque and tartar.

- proven combination of ingredients
- lasting effect with long term pain relief
- antibacterial due to zinc chloride
- supporting sensitive ingredient potassium citrate.

For adults use only, not suitable for children under the age of 6.

SILCA PUTZI - TUTTI-FRUTTI

SILCA Putzi is intended for toothbrushing beginners right up until they start school.

The toothpaste, developed with respect to the delicate infantile mucosa, contains a mild foaming agent and no ingredients, which might cause harm if swallowed. For this reason, it also only contains the recommended minimum amount of fluoride (500 ppm).

Sweeteners (without sugar) and flavours have been chosen, in a way, the children can enjoy using the

toothpaste without wanting or feeling the need to swallow. This recommendation is based on a guideline of the European Academy of Paediatric Dentistry (EAPD), issued in 2009, and the dosage recommendations of the American Dental Association (ADA).

Brush your teeth twice daily. Suitable for children up to 6 years.

PUTZI - STRAWBERRY

Putzi strawberry ideal for toothbrushing beginners right up until they start school.

The toothpaste, developed with respect to the delicate infantile mucosa, contains a mild foaming agent and no ingredients, which might cause harm if swallowed. For this reason, it also only contains the recommended amount of fluoride (1000 ppm).

Sweeteners (without sugar) and flavours have been chosen, in a way, the children can enjoy using the

toothpaste without wanting or feeling the need to swallow.

* In September 2018 the German Dental Associations issued a new recommendation on the fluoride content of children toothpastes. It is now recommend to use a toothpaste with 1000 ppm fluoride from the first tooth onwards.

Brush your teeth twice daily.Suitable for chlidren upto 6 years.
